

DENTAL PLUS

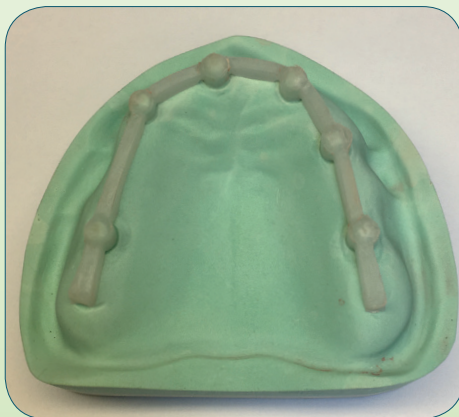

Evolutionary multicolor blanc technologie

With our new multicolor blanc A2-3-pink we give our customers a possibility for the digital manufacturing trend of modern dental prostheses.

With this high performance polymer it is possible to manufacture in only to one step of a procedure highest aesthetic crown and bridge situations with the suitable Gingivaparts.

Highest fracture stability, high biocompatibility, high resistance for plaque, less restmomomer content distinguish this high performance polymer.

Most situable for implant technologie, bar and telescope technique and digital complete dentures.
